Scoring Calculations

Coverage & Maturity - 14 diagrams

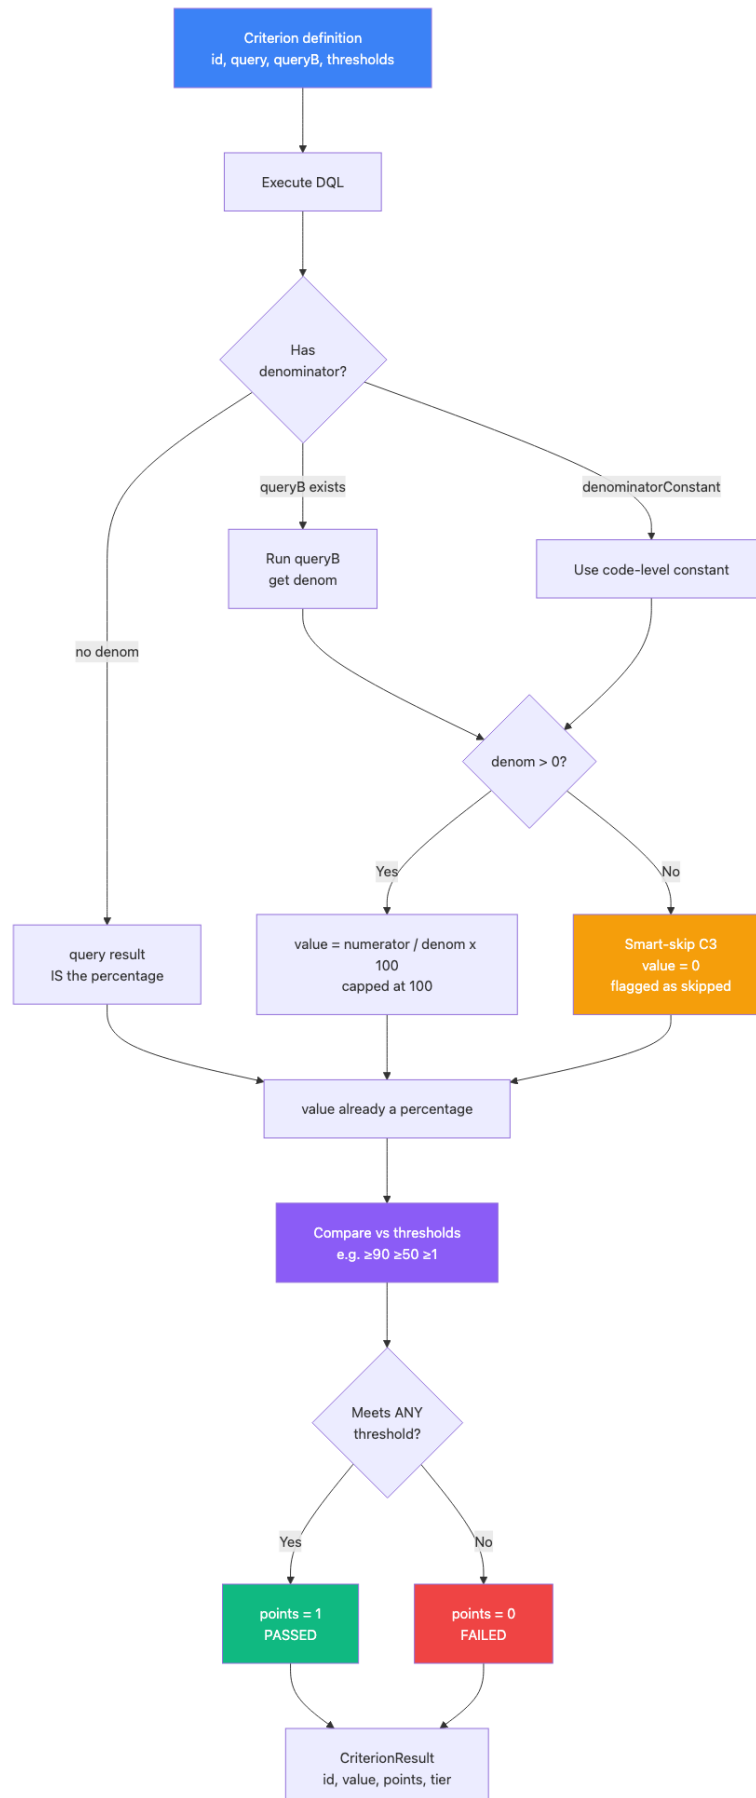

Version 2.5.3 - generated from docs/SCORING-CALCULATIONS.md

Contents

1. How a criterion becomes 0 or 1
2. Coverage Score (simple formula)
- 3.1 Tier classification
- 3.2 Per-tier percentage calculation
- 3.3 Progressive gates - the key rule
- 3.4 Maturity Level (L0-L3)
4. Worked example - setup
4. Worked example - Maturity calculation
4. Worked example - Level decision
5. Coverage vs Maturity - side by side
5. Coverage vs Maturity - scenarios
6. Total Score - aggregating 9 capabilities
7. What changes the score (and what does not)
8. TLDR visual

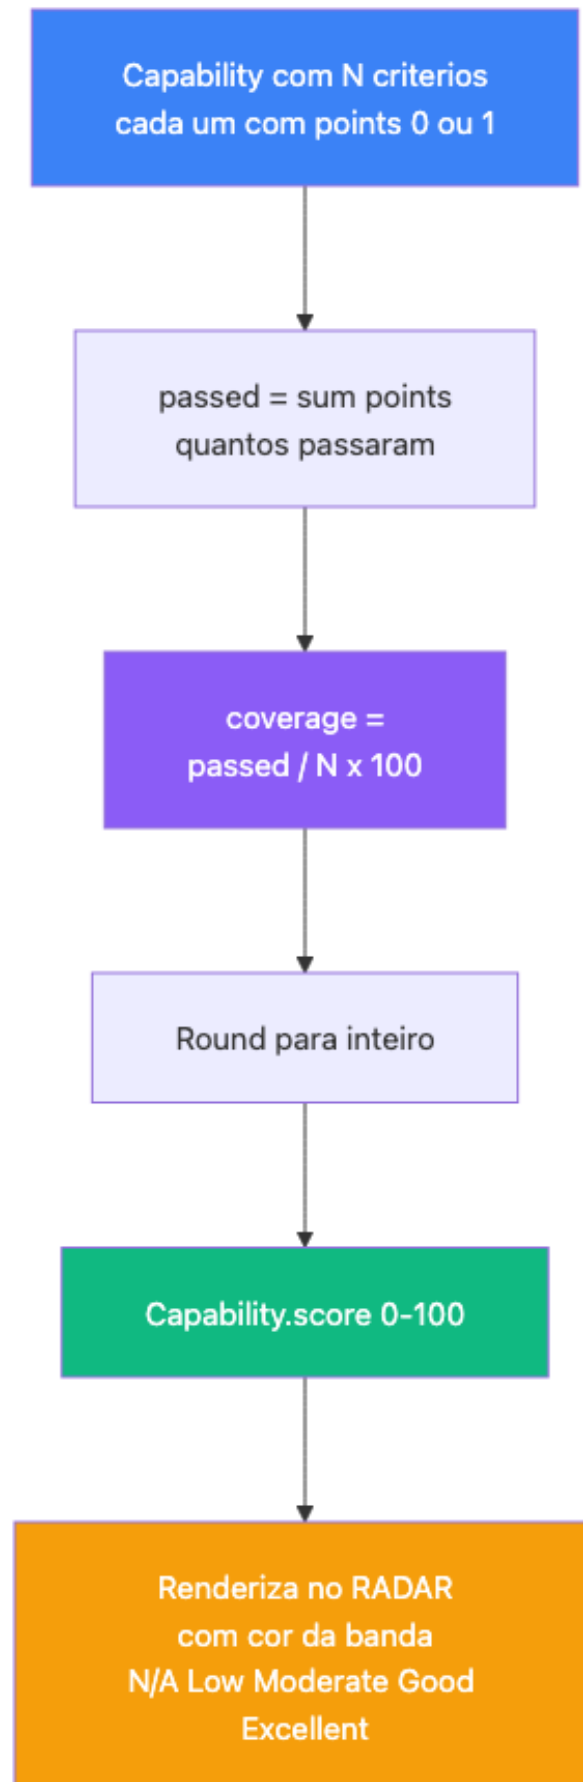

1. How a criterion becomes 0 or 1

Each of the ~94 criteria runs the same pipeline: DQL ratio, threshold check, binary points.

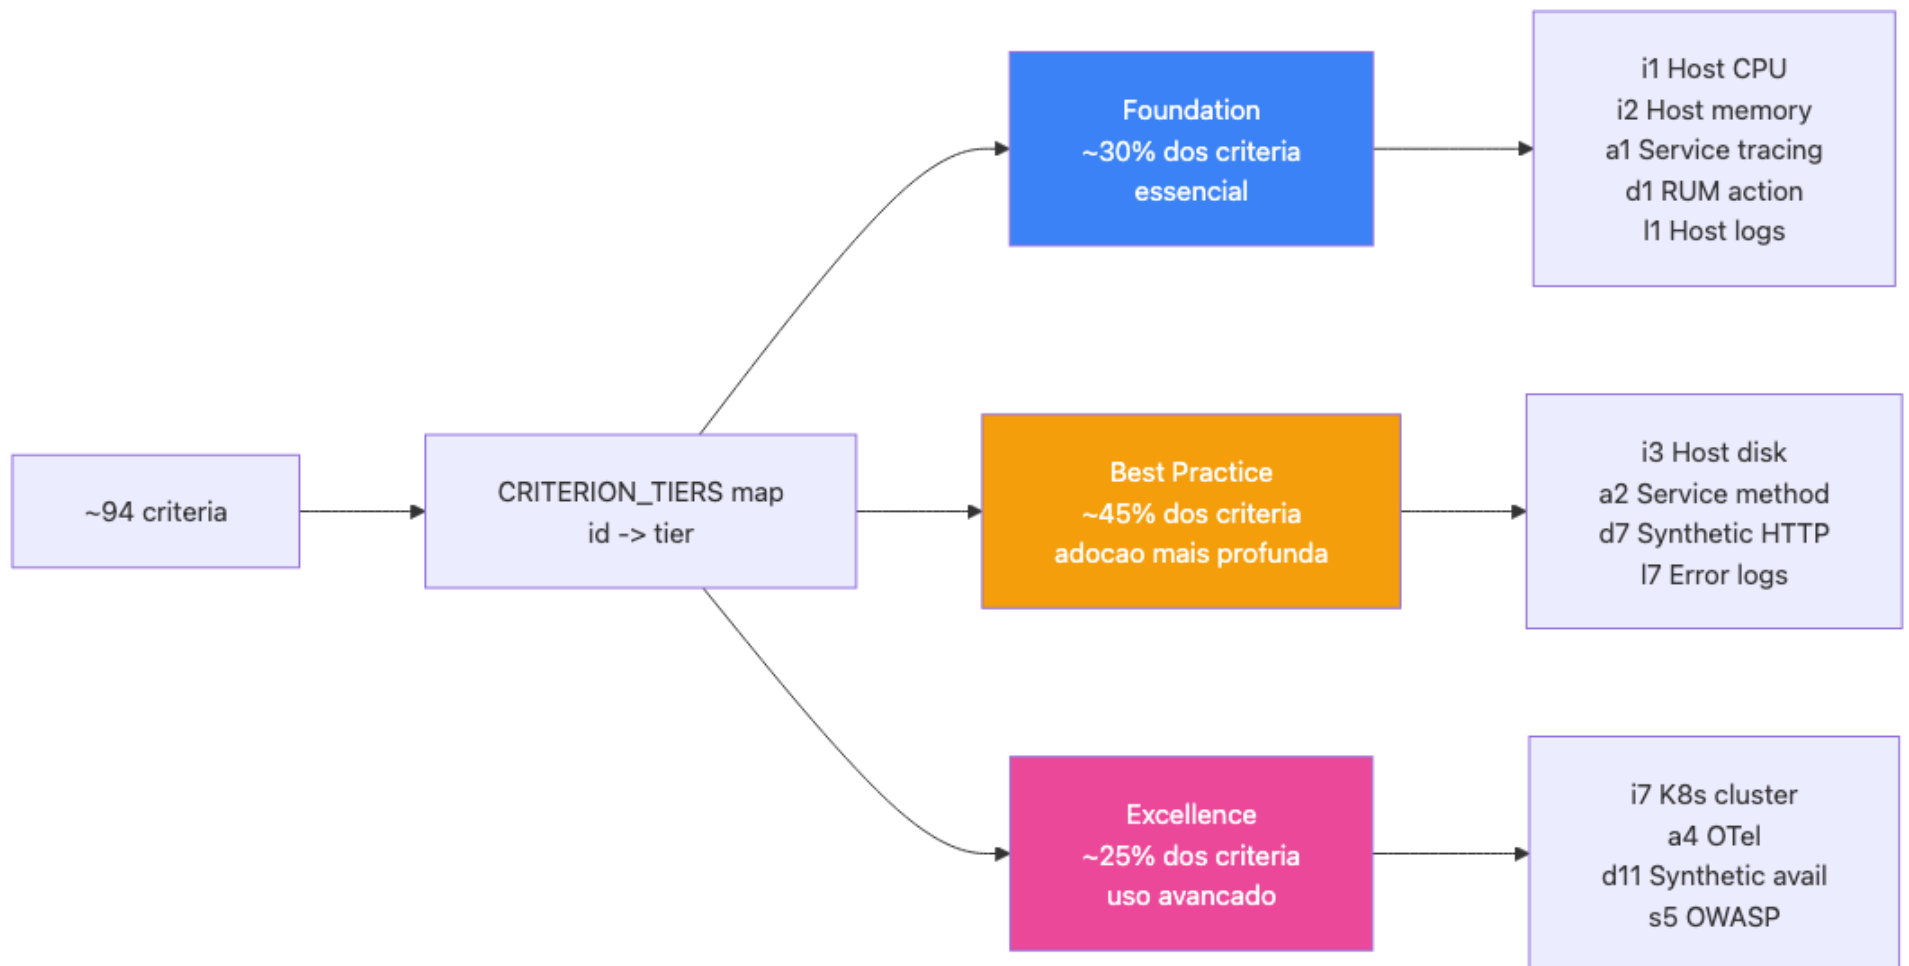

2. Coverage Score (simple formula)

Average of criteria that passed - this is the number on the radar.

3.1 Tier classification

Every criterion is classified Foundation / Best Practice / Excellence.

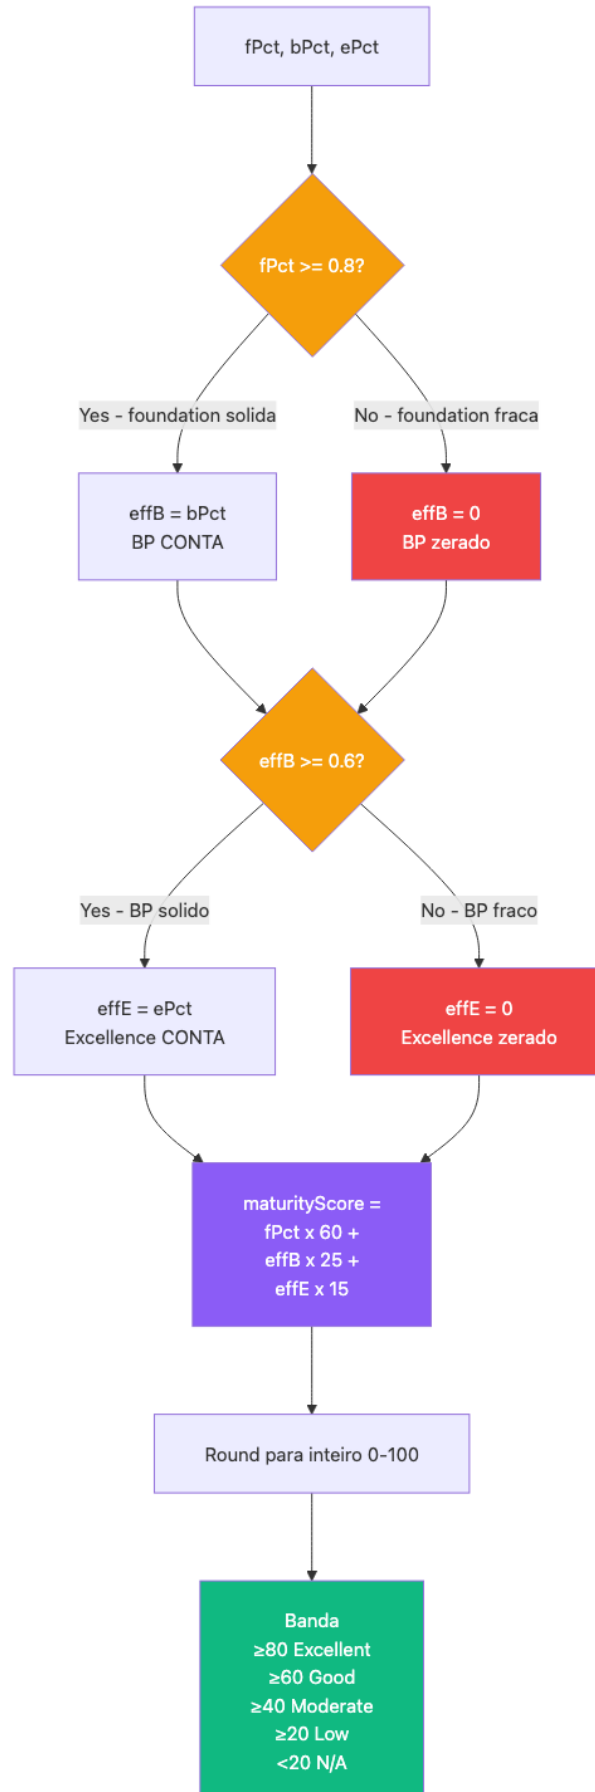

3.2 Per-tier percentage calculation

Within a capability, count how many criteria passed in each tier.

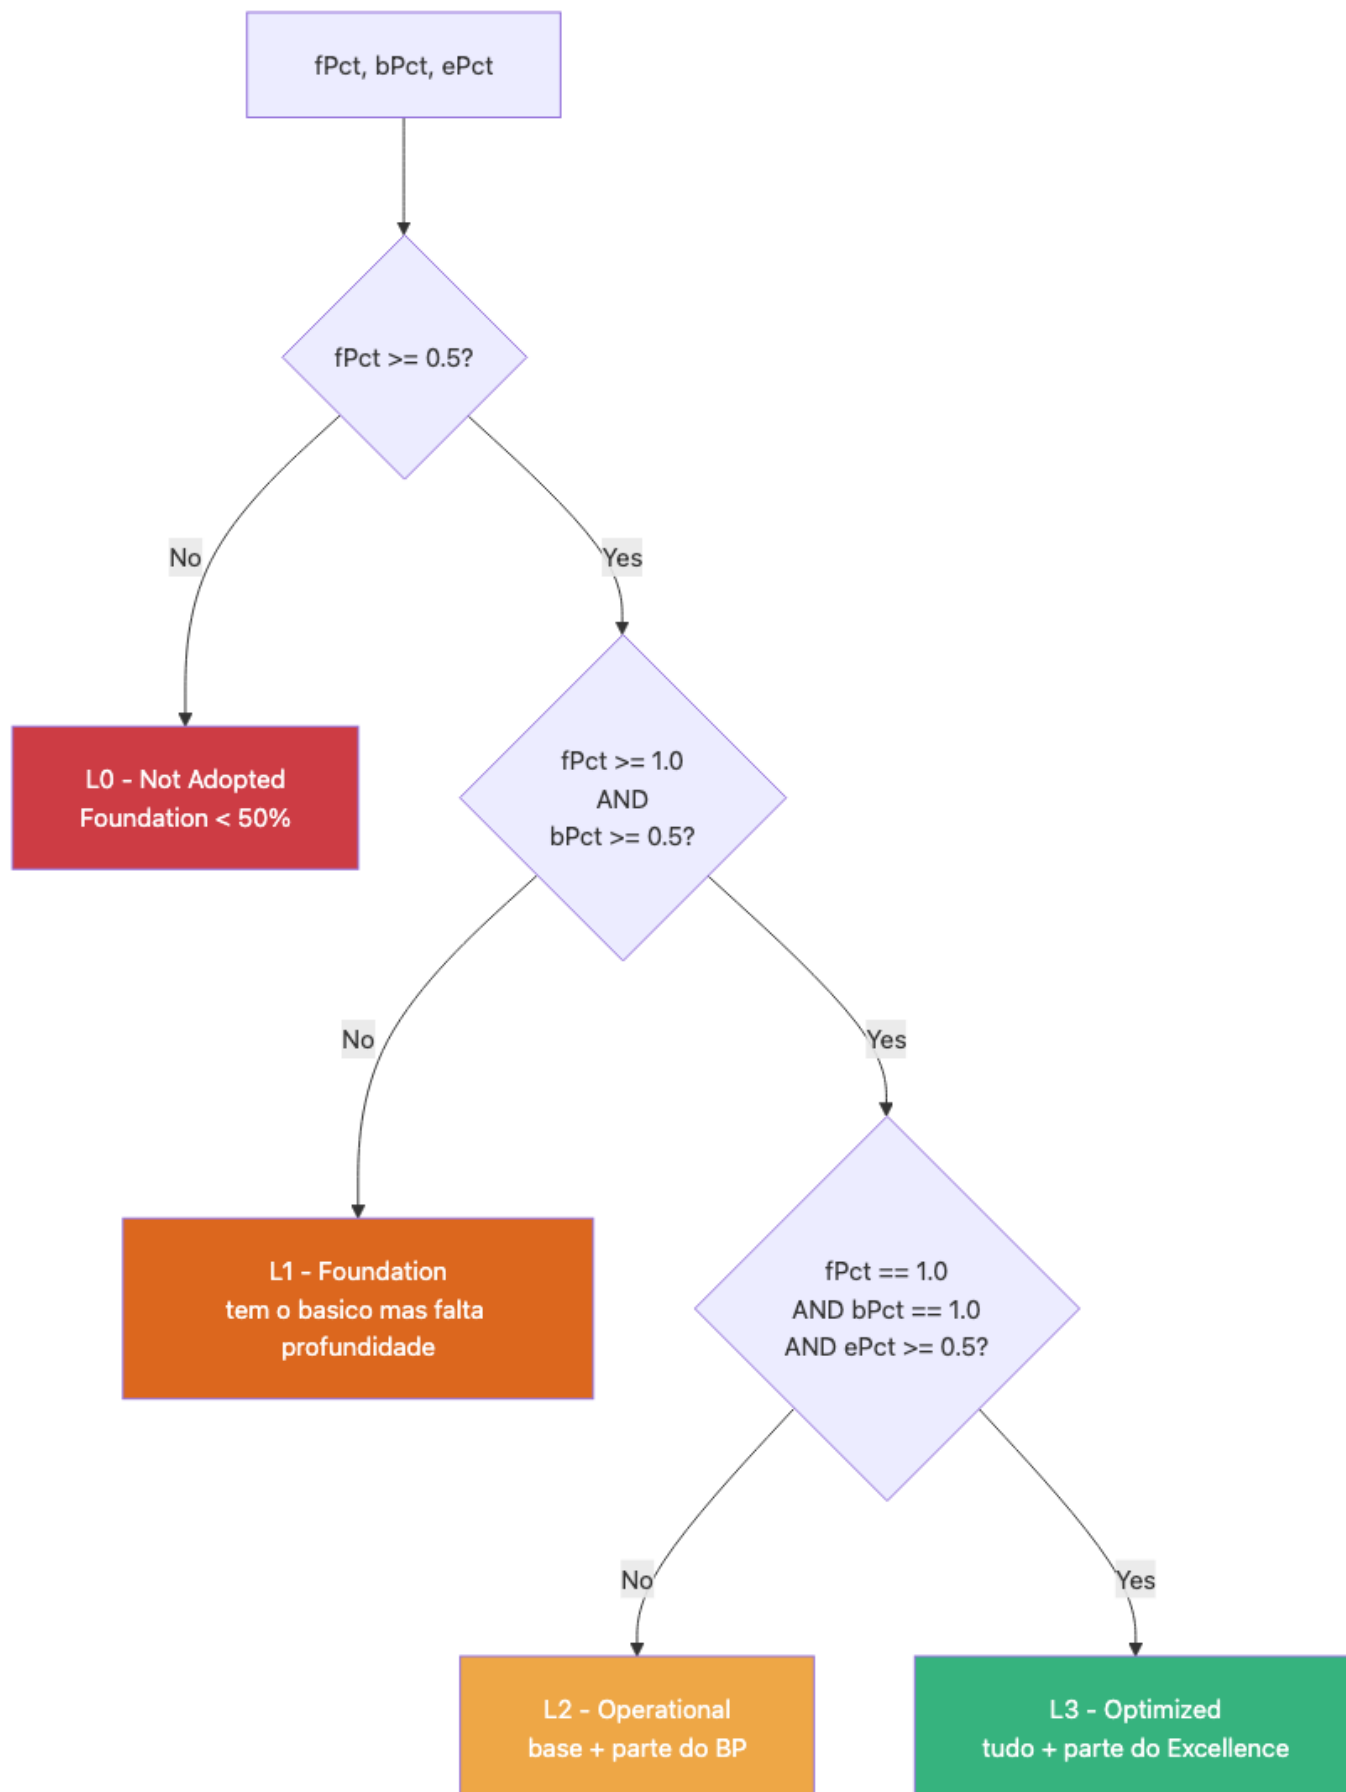

3.3 Progressive gates - the key rule

BP only counts if Foundation $\geq 80\%$. Excellence only counts if BP $\geq 60\%$.

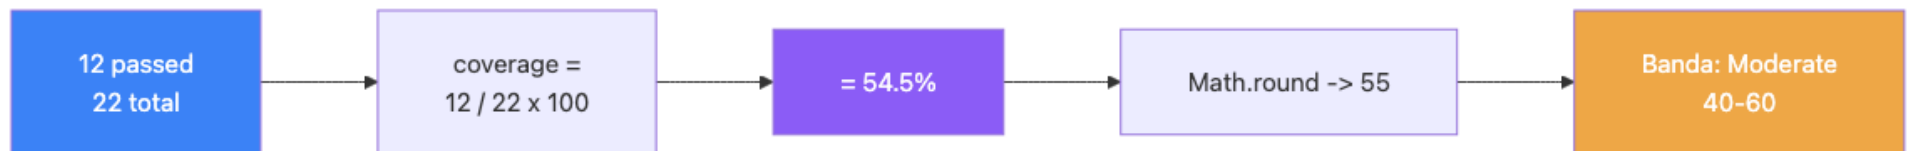

3.4 Maturity Level (L0-L3)

Discrete level label - easier to communicate than the score number.

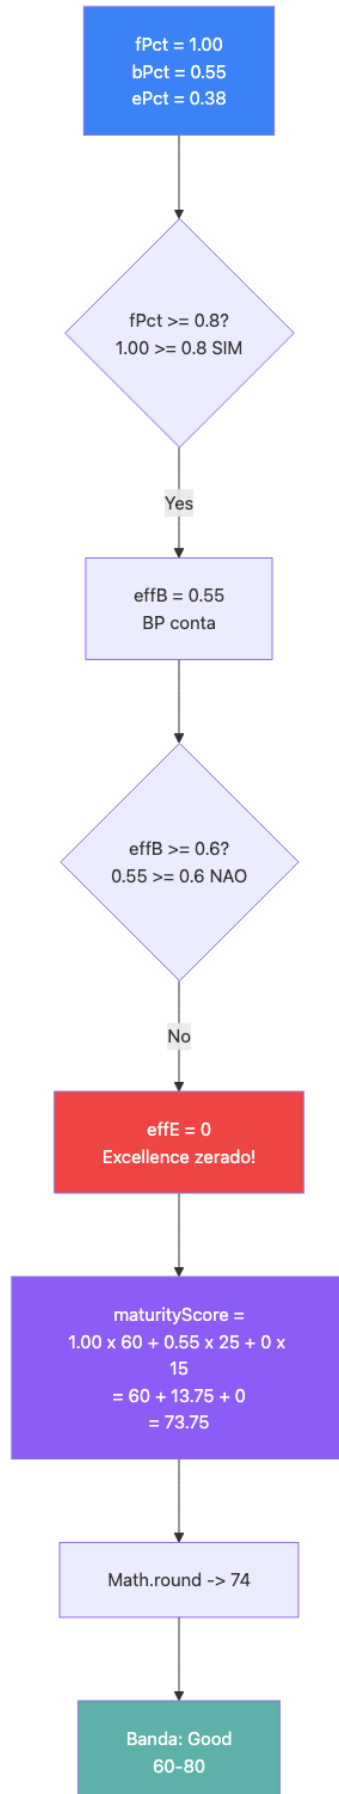

4. Worked example - setup

Infrastructure capability, 22 criteria: F=3/3, BP=6/11, E=3/8.

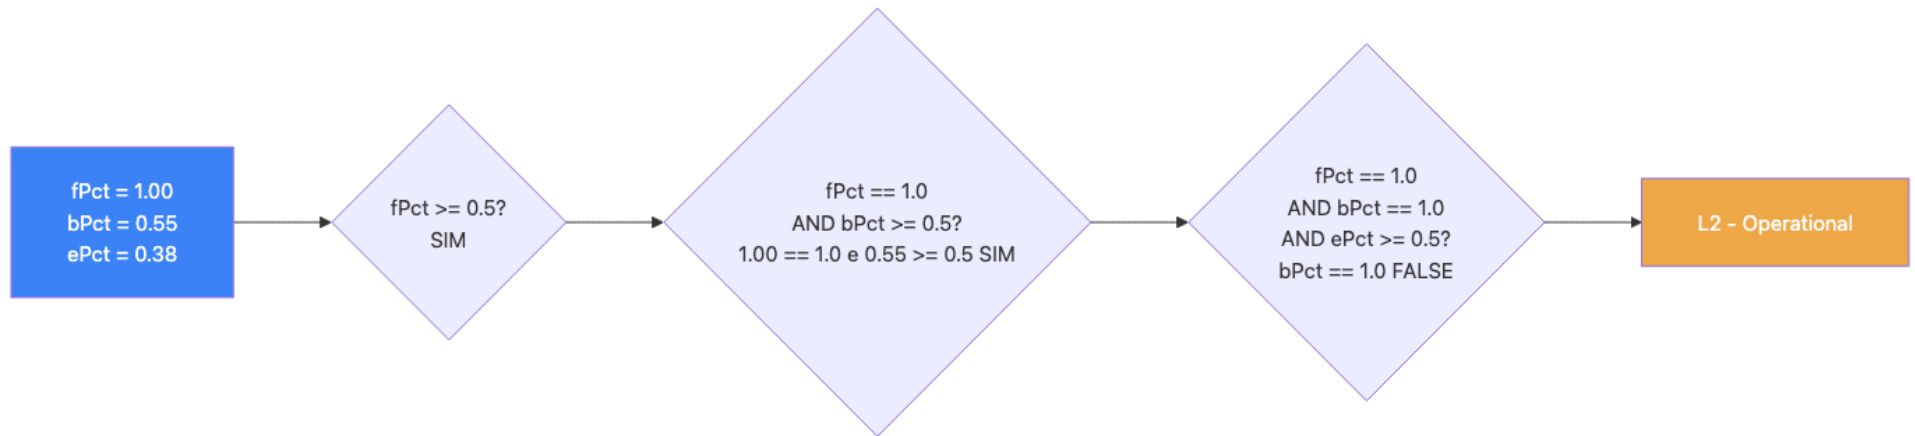

4. Worked example - Maturity calculation

fPct=1.00, bPct=0.55, ePct=0.38 -> Maturity = 74 (Excellence zeroed by gate).

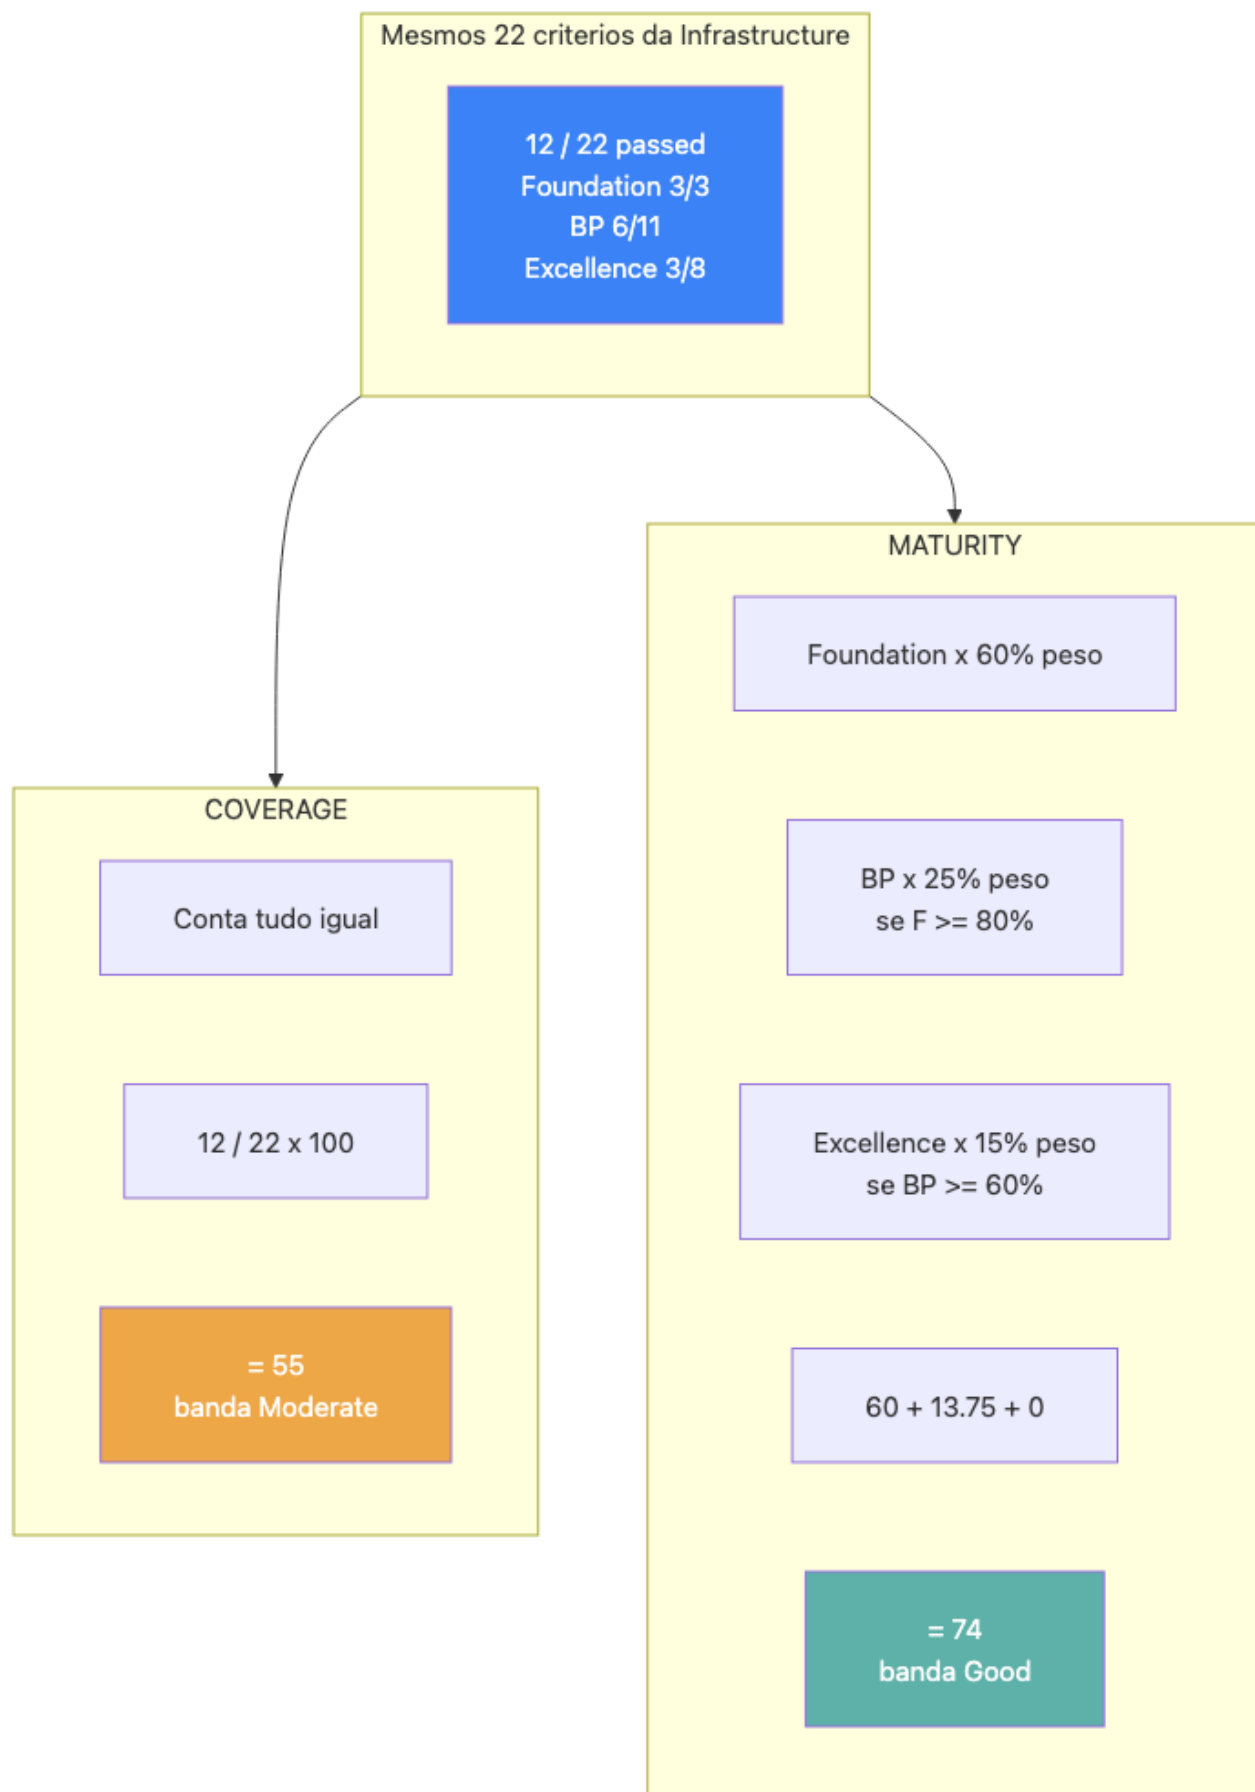

4. Worked example - Level decision

fPct=1.00, bPct=0.55 -> L2 Operational.

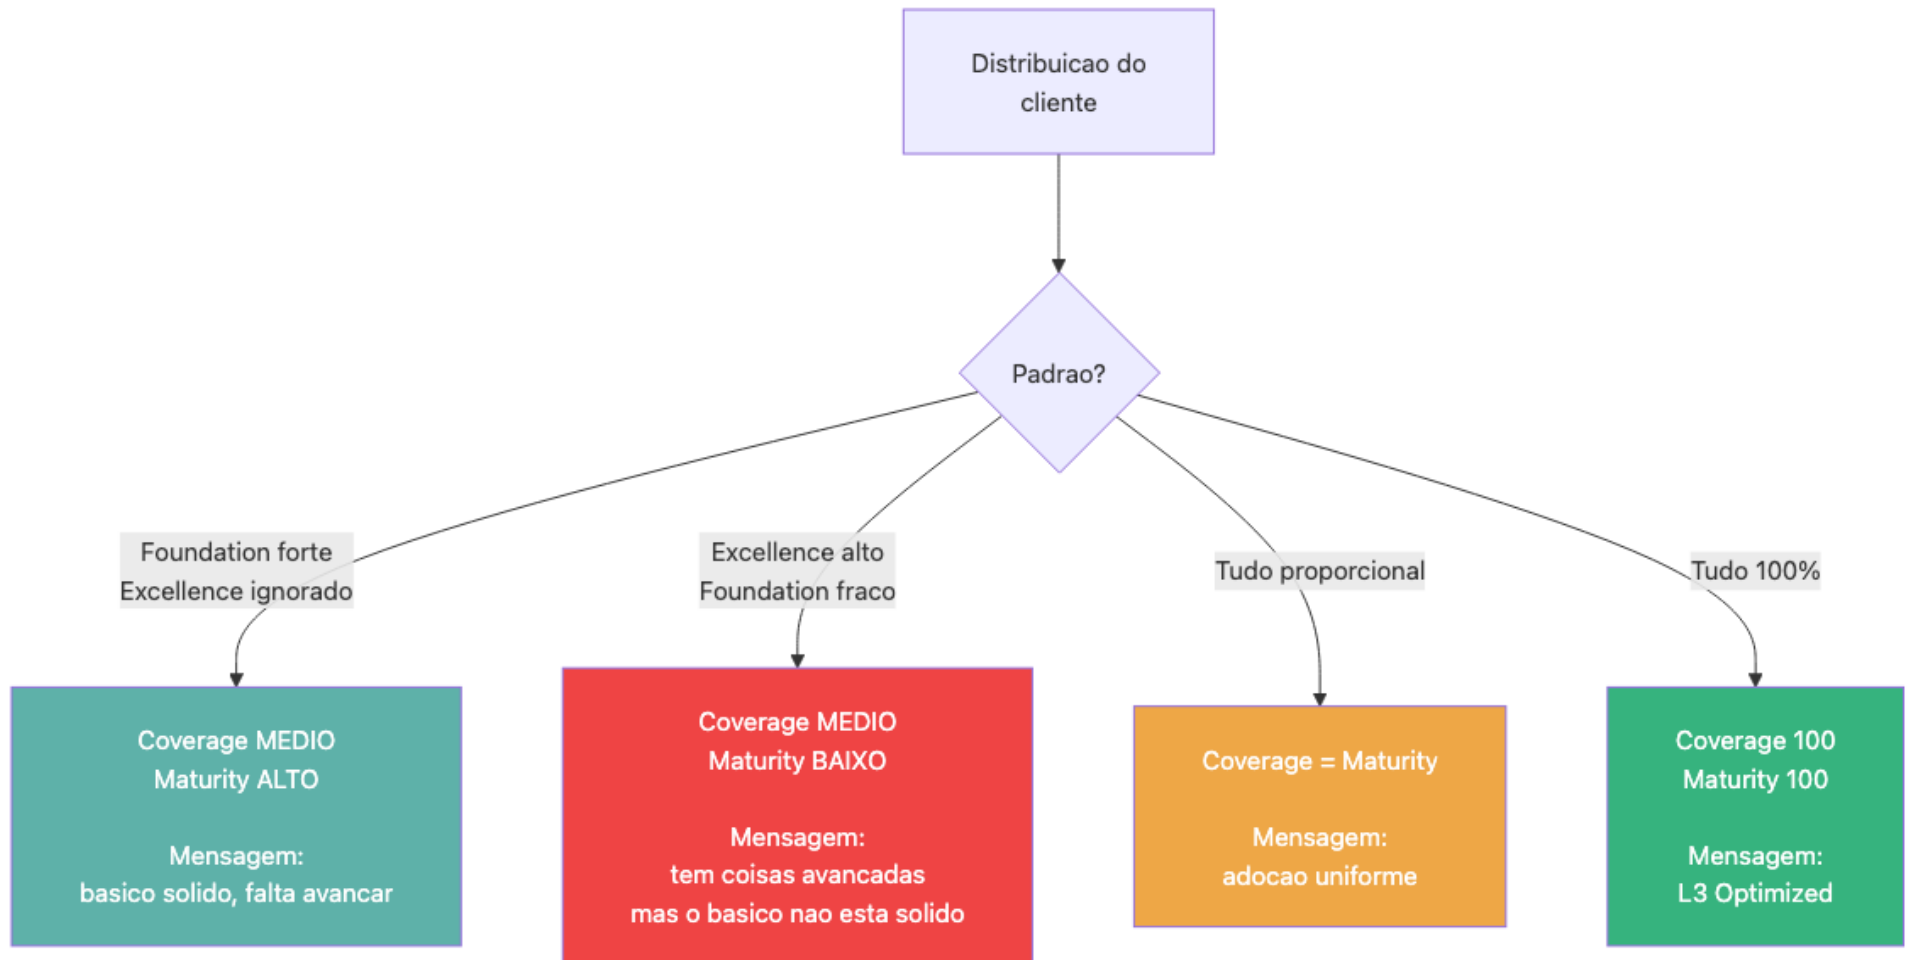

5. Coverage vs Maturity - side by side

Same criteria, two different aggregation paths.

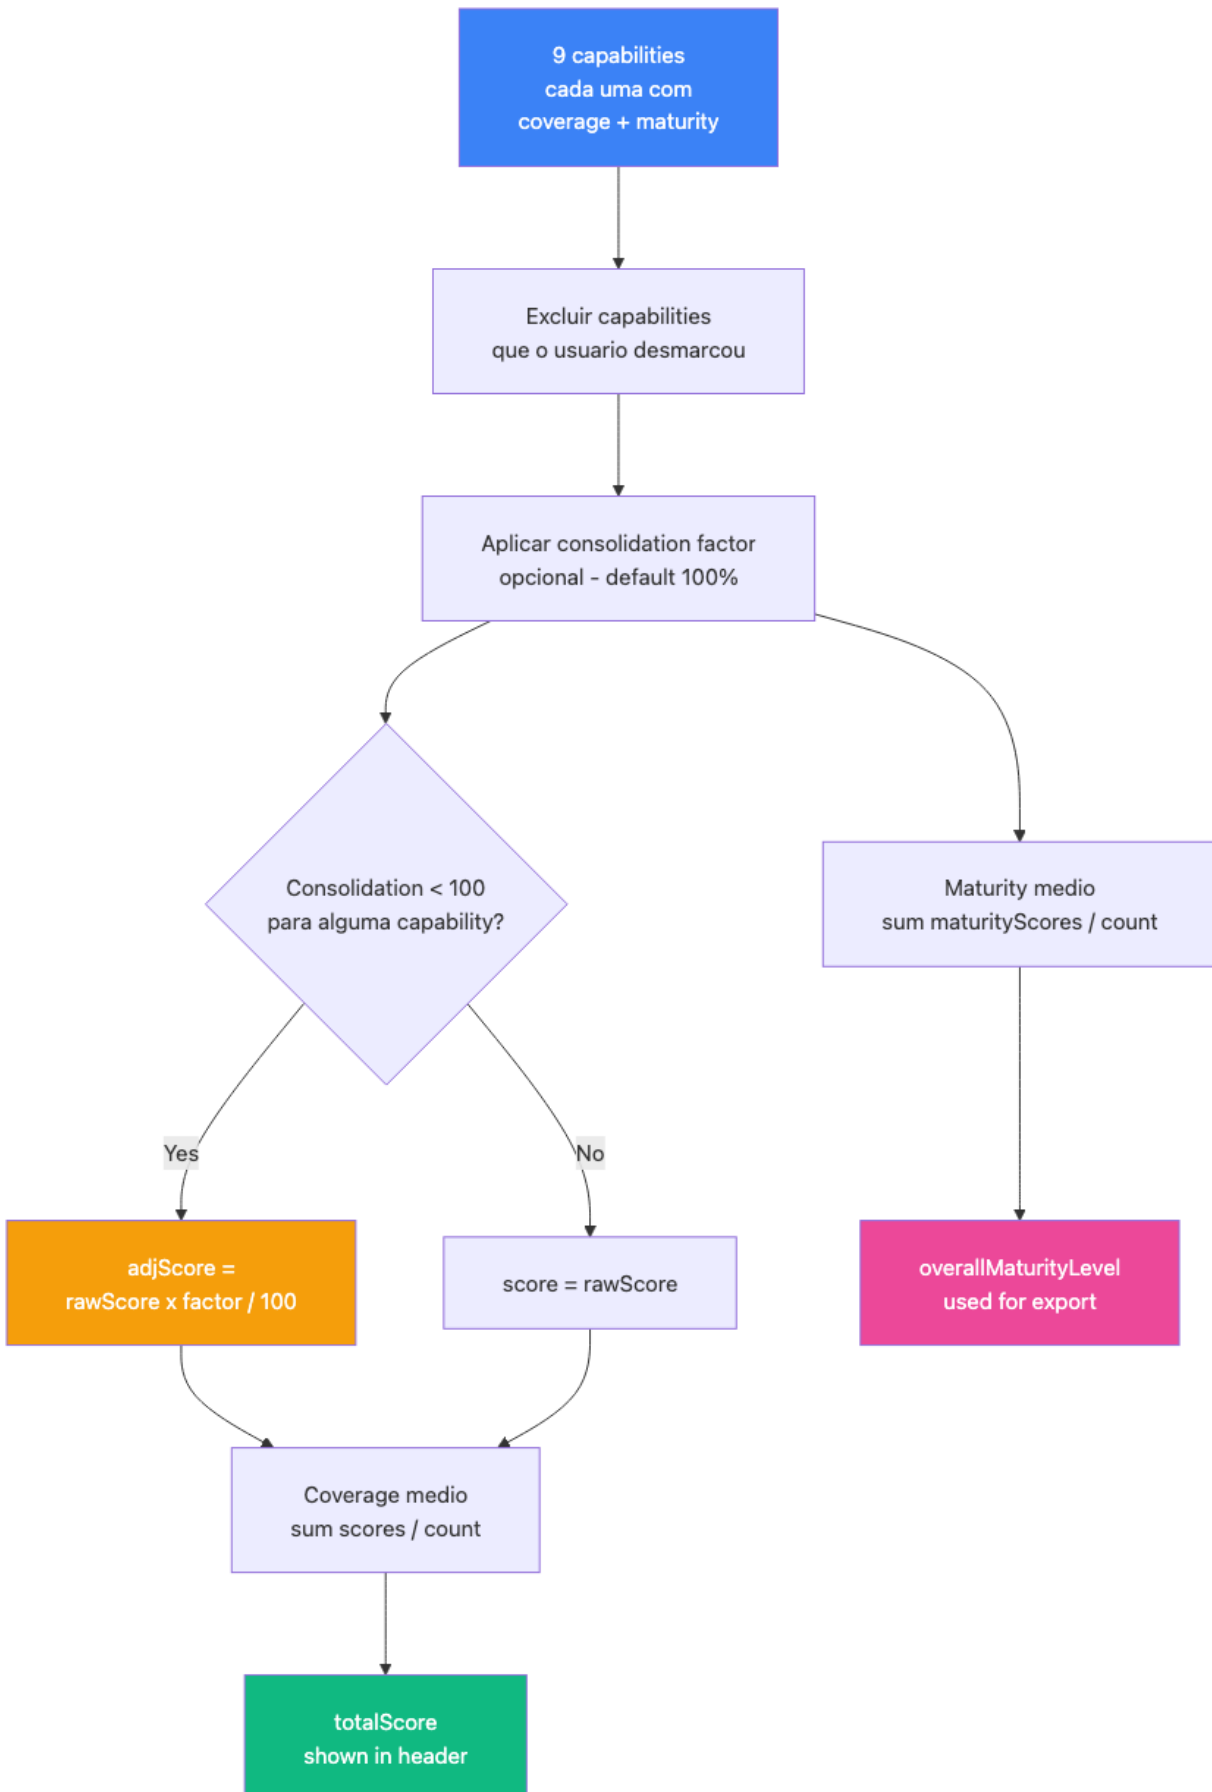

5. Coverage vs Maturity - scenarios

When do the two numbers diverge - and what the divergence means.

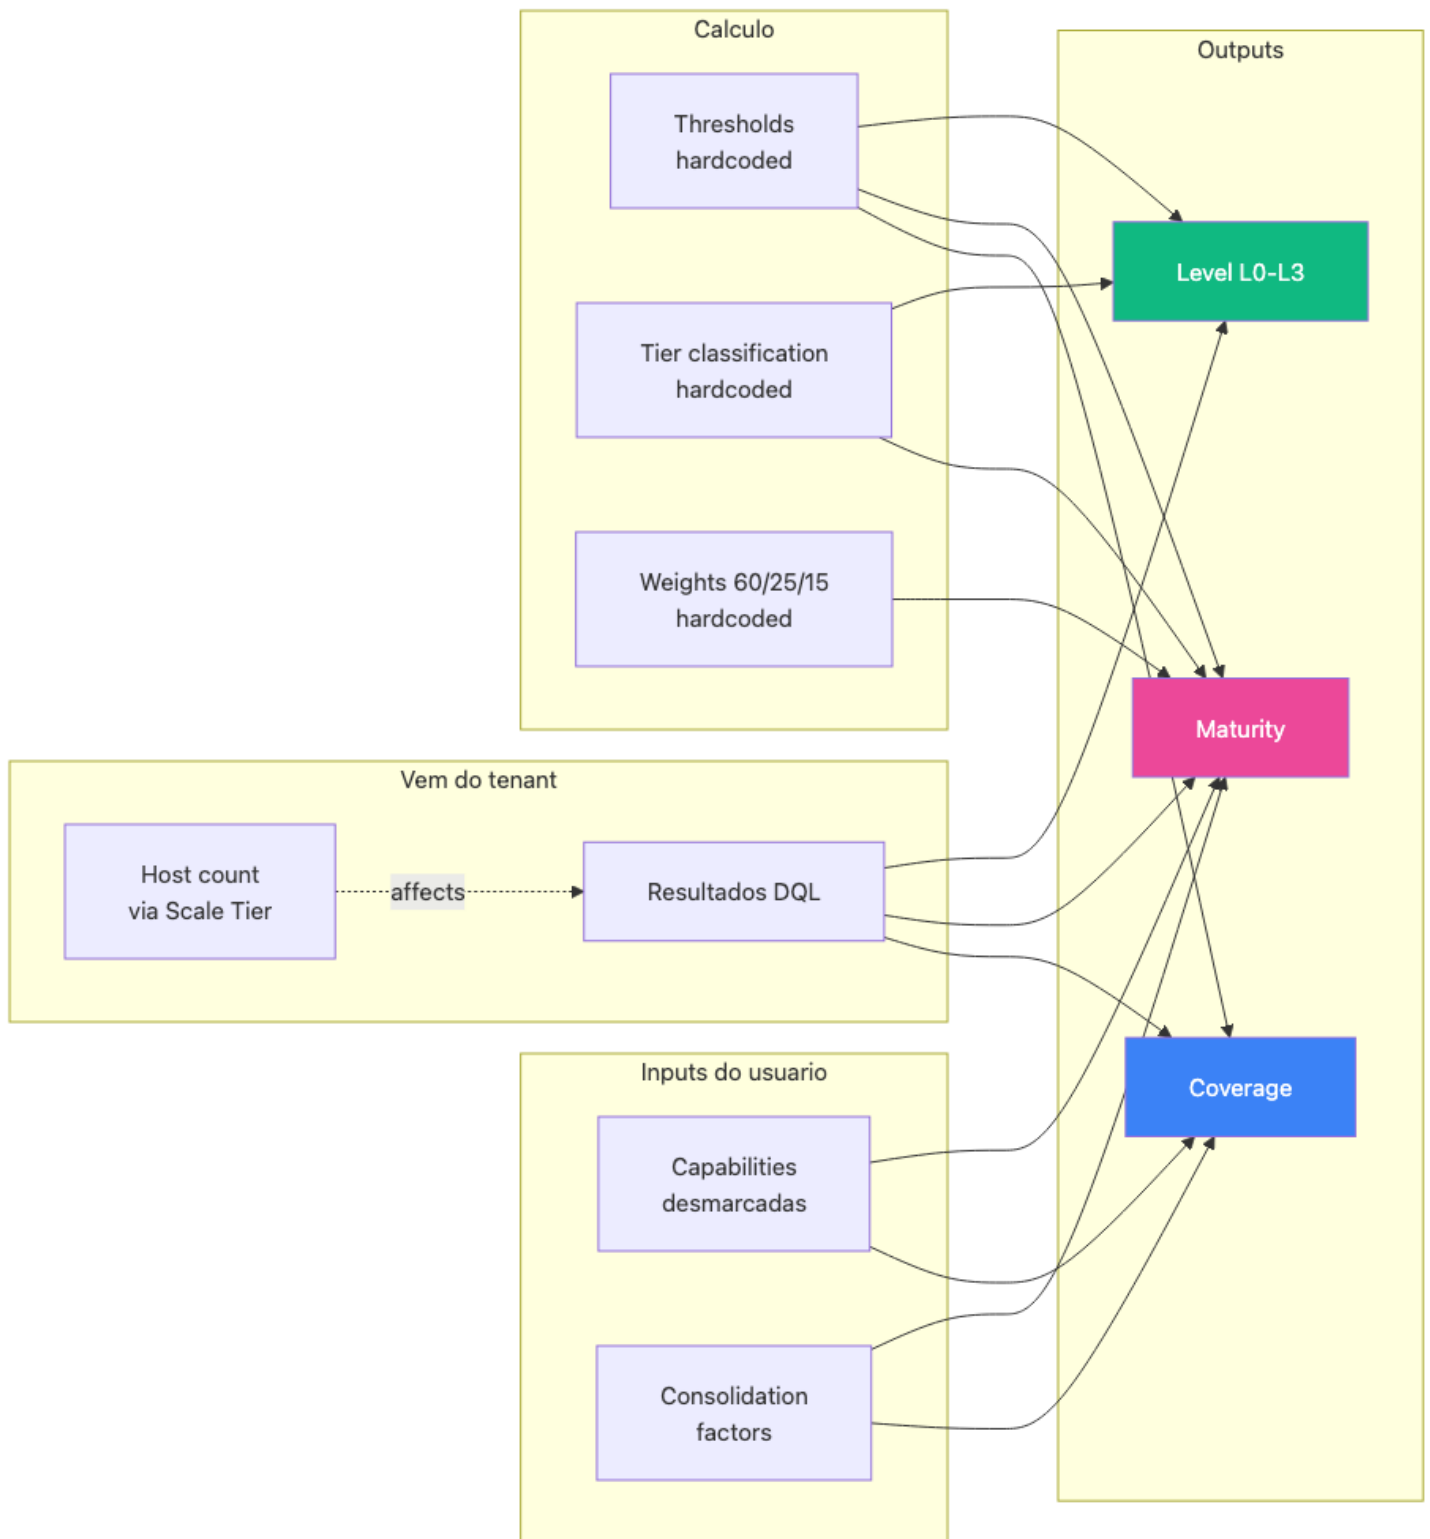

6. Total Score - aggregating 9 capabilities

How the per-capability scores roll up into the header number.

7. What changes the score (and what does not)

Inputs from the tenant vs hardcoded constants.

8. TLDR visual

Coverage = breadth (simple average). Maturity = depth + ordering (progressive weighted).
